Two Laby[®] Compressors to Spain for LNG Project

Burckhardt Compression delivers two labyrinth piston compressors to Spain for the Barcelona LNG project.

Burckhardt Compression recorded an order for an LNG expansion terminal in Barcelona. The LNG import terminal will be operated by Enagas S.A., Madrid. The contractor for this expansion project is Foster Wheeler Iberia S.A., Madrid. The contract comprises two labyrinth piston compressors (Laby[®]). These compressors are designed to operate down to minus 160 degree Celsius suction temperature. The discharge pressure is at 12 bar g.

The LNG import terminal is used for regasification of LNG. This plant will supply gas for general industrial consumers and also for home use.

Burckhardt Compression is a leading supplier of compressors for ultra low temperature boil-off gas applications. The company offers technical solutions in the oil-free compression of cryogenic gases backed by 75 years of experience.

Laby[®] compressors are used in the chemical and petrochemical industry. Laby[®]'s compress bone-dry, dirty, abrasive and other gases with no contamination and without oil, with a discharge pressure up to 300 bar (4350 psi), flow up to 11'000 Nm³/h (6500 scfm), shaft power up to 2100 kW (2800 HP). Laby[®] compressors are extremely reliable machines with unexcelled availability, combining high performance with a unique cooling system. Burckhardt Compression's Laby[®] easily manages the compression of LNG boil-off gas at suction temperatures down to minus 160°C (250 F).

Burckhardt Compression is a world leader in reciprocating compressor technology and the only manufacturer of a complete series of labyrinth piston (Laby[®]), process gas, and hyper compressors for numerous applications. Their compressors are used in the field of oil refining, chemical and petrochemical industries, air separation, as well as gas transport and storage. Burckhardt Compression's worldwide service network ensures a wide customer support service; analysis of compressor performance, complete plant overhaul, consultation, or fulfilling extensive maintenance contracts.
