Burckhardt Compression acquires Swiss sealing component manufacturer MT Sealing Technology Inc

Burckhardt Compression signed an agreement on July 2, 2007 to acquire Swiss sealing component manufacturer MT Sealing Technology Inc. This internationally active company based in Winterthur-Ohringen develops and produces high-quality metallic and non-metallic sealing components used for reciprocating compressors and marine diesel engines.

Burckhardt Compression is further expanding its offering of high-end compressor components with the acquisition of MT Sealing Technology. MT Sealing Technology is a successful, highly specialized small company with annual turnover of approximately CHF 5 million and 20 employees. The new member of the BC Group will retain its operational independence. The already existing cooperation between the two companies in developing and manufacturing sealing components will be intensified. The unique combination of Burckhardt Compression's compressor and material know-how with MT Sealing Technology's manufacturing quality, competence and flexibility marks another step forward in implementing the strategy of offering our customers cutting-edge compressor components technology to extend the operational life and lower the total life cycle costs of their compressors.

About Burckhardt Compression

Burckhardt Compression is one of the market leaders in the field of reciprocating compressor technology and the only manufacturer that offers a complete range of Laby[®] (labyrinth piston), process gas, and hyper compressors. Burckhardt compressors are used in a wide range of applications in the chemical and petrochemical industry, in refineries, in air separation systems, and for gas transport and storage. Its products are used to compress, cool or liquefy gas, for example hydrocarbon or industrial gases. Its customers include multinational companies in the oil, gas, petrochemicals and chemicals industries.

In addition to its thriving new installation business, a major driver of the company's success is its global service network, which generates a substantial share of company revenues. This global network enables Burckhardt Compression to offer comprehensive customer support services, such as delivery of top-quality components, servicing of compressor valves, complete system overhauls, engineering services and the fulfillment of comprehensive maintenance contracts.
