
Ad hoc announcement pursuant to Art. 53 LR of January 12, 2026

Burckhardt Compression announces leadership change in Services Division

Martin Zingg appointed as new President of Services Division, effective April 1, 2026

Winterthur, Switzerland, January 12, 2026 — Burckhardt Compression announces a leadership change in its Services Division (SERV). Rainer Duebi, currently President of the SERV Division, will step down from his current position. He will remain with Burckhardt Compression in a new function that will be communicated at a later stage.

Effective April 1, 2026, Martin Zingg will assume the position of President of the Services Division and become a member of the Executive Management.

Martin Zingg brings over two decades of international leadership experience in industrial services and energy solutions. Most recently he was President & Group CEO at Leister, an international technology company, headquartered in Central Switzerland. Earlier in his career, Martin held senior leadership roles at GE Power and Alstom, managing global service businesses for gas turbines with full P&L responsibility and 10 years of international leadership assignments. He holds a Master of Science in Mechanical Engineering from EPFL and completed his Master Thesis at the Massachusetts Institute of Technology (MIT).

Fabrice Billard, CEO of Burckhardt Compression, commented: "We sincerely thank Rainer Duebi for his outstanding leadership and dedication in shaping our Services Division into a global powerhouse. We are glad to continue to leverage his long-standing experience in a new role. At the same time, we are excited to welcome Martin Zingg to Burckhardt Compression. His proven track record in leading global service organizations and his deep industry expertise will be invaluable as we further strengthen our service offering and customer partnerships worldwide."

Burckhardt Compression

Burckhardt Compression creates leading compression solutions for a sustainable energy future and the long-term success of its customers. With its brands Burckhardt Compression, PROGNOST, SAMR Métal Rouge and Shenyang Yuanda Compressor, the Group covers a full range of reciprocating compressor technologies and services. Founded in 1844 as an engineering workshop in Basel, Burckhardt Compression developed its first single-stage and dry-running reciprocating compressor in 1883. Since then, the Group has continually developed and reinvented itself, adapting to the

developments of its key markets petrochemical/chemical industry, gas transport and storage, hydrogen mobility and energy, industrial gas, refinery, as well as gas gathering and processing.

With its headquarters in Winterthur, Switzerland, Burckhardt Compression is represented on all continents with 36 subsidiaries, three manufacturing and five assembly sites worldwide.
