We are recruiting a

## Field Service Engineer

In this position you will work worldwide and perform a variety of tasks on our reciprocating compressor systems

Your main responsibilities are:

- Global Field Service activities in the oil & gas sector
- Mechanical erection of reciprocating compressors and auxiliary systems
- Commissioning of reciprocating compressors and auxiliary systems
- Maintenance and repair work on Burckhardt compressors and other brands
- Liaise closely with the Project Manager and the Technical Service Support to ensure deadlines are met
- Active participation in turn-key projects
- On-shore and off-shore assignments
- Reporting to headquarter
- Training and instruction of customer

Suitably qualified candidates have successfully graduated an apprenticeship in the mechanical sector, for instance as Construction or Agricultural Machinery Mechanic. We expect a few years of practical working experience in industrial environment, preferably on machinery, or a comparative type of hands-on work. It would be beneficial, if you have acquired experience on rotating equipment or performed in this field of work. You will spend at least 90% of your working time abroad, this calls for willingness to stay overseas on long-term projects. To communicate with customers on site, you need to have excellent communication skills and the ability to deal with people of different nationalities. Beside the ability to read and understand mechanical and electrical drawings, you should be familiar with all MS Office applications. Good command of English (oral & written) is a must, any further language is an asset.

We offer you an exciting and challenging job in an international environment with career advancement opportunities. Our employees appreciate the good working atmosphere and modern pay packages as well as the very good social and pension benefits.

Successful applicant must be authorized to work at Burckhardt Switzerland without sponsorship. We look forward to receiving your complete application documents.
