

Media Release of December 20, 2019

Burckhardt Compression sells its first high-speed compressor for underground gas storage application in Europe

Burckhardt Compression will deliver a high-speed compressor to Ganzair in Hungary for injecting natural gas from a pipeline to an underground gas storage facility. This ISO 13631 compliant compressor will be the first high-speed compressor made by Burckhardt Compression for this sort of application in Europe.

In December 2019 Burckhardt Compression sold its first high-speed compressor system in Europe that meets all the requirements of ISO 13631 standards. It will be the first compressor made by Burckhardt Compression for injecting natural gas from a pipeline to an underground gas storage facility. The single-stage compressor will be manufactured at Shenyang Yuanda Compressor, one of China's leading compressor manufacturers in which Burckhardt Compression owns a 60% stake. Burckhardt Compression offers now globally the high-speed product line that covers a wide range of power from 100 kW to 7.5 MW and are suitable for different applications for upstream and midstream markets.

Promising application area

Underground reservoirs are used to store large amounts of compressed natural gas along international pipeline networks for balancing fluctuations between gas supply and demand. "We are pleased to expand our offering of compressor systems to this application area and that we can offer now solutions for gas pipeline to storage applications," says Marcel Pawlicek, CEO of Burckhardt Compression. "We are pleased with the product support and compressor expertise that Burckhardt Compression brings to our project. We are looking forward for a successful partnership", said Oliver Gidai, CEO of Ganzair.

About Ganzair Compressortechnics

Ganzair Compressortechnics is a leading manufacturer of compressor systems in Hungary. Its products are used for a wide range of applications in the oil and gas industry, as well as in compressor systems for vehicles, for example brake compressor units for railway or public transit vehicles. A privately held company established in 1990, Ganzair Compressortechnics specializes in compressing gases as well as in related processes, such as cleaning and distribution of compressed air or industrial gases. All solutions are tailored to customer needs and sold to customers in Hungary and across the globe. Besides turnkey solutions, Ganzair also offers technical support.
